MANAGING FRAILTY

Objectives

This one day Forum is an important opportunity for ADVANTAGE JA partners, Member States health representatives and stakeholders to discuss the following topics:

- The draft Frailty Prevention Approach (FPA).
- How policy makers, organisations, managers and professionals can use the ADVANTAGE JA recommendations to address frailty prevention in the EU.
- The role of the different stakeholders to support the implementation of the ADVANTAGE JA recommendations.
- How ADVANTAGE JA needs to take into account the political, social, professional and citizen context to succeed in the endeavour.

Prevention Approach document (FPA)

ADVANTAGE JA Consortium based on evidence and specific MS surveys has developed the concept of the Frailty Prevention Approach (FPA) in health and social care services, by encouraging consensus and developing common frameworks on screening, prevention, assessment and management of frailty throughout the EU.

The FPA will provide guidance on how to strengthen national /regional capacities and accelerate national/regional efforts to set up or further develop a frailty prevention policy in the participating MS. In concrete terms the FPA will give support to:

- Identify national/regional areas of action on frailty and position these within the MS health priorities.
- Set national/regional objectives and deliverables for the specific areas of action.
- Implement proven interventions to reduce risk factors for frailty.
- Implement proven interventions to manage frailty at individual level.
- Implement proven interventions to train the health workforce.
- Measure progress and results, taking into account proposed indicators.
- Advance action beyond the health sector through multi-sector co-operation.
- Promote international collaboration and across regions within participant MS to transfer and scale-up best practices.

A draft of the ADVANTAGE JA FPA document will be officially presented and discussed at the Madrid Forum.
